**Title:** **CN1236102A: QUICK TESTING REAGENT FR SALIVA CARCINOE ANTIGEN**

**Derwent Title:** Quick testing reagent for saliva carcinoembryonic antigen [Derwent Record]

**Country:** CN China

**Kind:** A Unexamined APPLIC. open to Public inspection i

**Inventor:** GUO GUANG XU; China  
JIA ZHENG WANG; China  
DACHENG LIU; China

**Assignee:** XU GUO GUANG China

**ECLA Code:** None

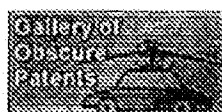

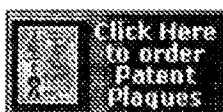

**Priority Number:** 1998-05-20 **CN1998199898108677**

**Abstract:** The quick testing reagent for saliva carcinoembronic antigen (CEA) consists of cellulose nitrate film, CEA-resisting monoclon antibody and colloid gold. Cellulose nitrate film of 0.3-0.45 micron is encapsulated with CEA-resisting monoclon antibody to form reaction filter membrane and colloid gold of 30-50 nm is labeled to CEA-resisting monoclon antibody to form reaction reagent. The present invention is very simple, fast, sensitive and strong in specificity, and testee is subjected to no damage. It may be used by the testee himself or base medical organization to carry out mass test of stomach cancer and precancerous lesin.
